Prior Art: Fukushima (U.S. Pat. No. 6,052,506).

Brief Description: The Office Action states that Fukushima "does not explicitly recite modification of the display instruction sequence but inherently teaches that in the same embodiment for displaying video, storing the video can be accomplished by the controller supplying a 'modified' control signal for recording or storing video on a computer readable medium. (Office Action dated June 9, 2010, at p. 4). Applicants respectfully submit Fukushima does not disclose installation and execution of a shader instruction sequence operative to (i) apply a visual effect to pixels which comprise a presentable representation of received information, (ii) direct the effected pixels to a display, and (iii) store the effected pixels in a storage device. Applicants would like to discuss related language to amend the claims in a form for allowance.

Respectfully submitted,

/Patrick J. Niedermeier #64,946/
